

## Data Request Form

To obtain data from the European Vegetation Archive (EVA), please first make an enquiry to the EVA database administrator Ilona Knollová (ikuzel@sci.muni.cz) whether the data meeting your needs are available. If they are, please fill in the form below and submit it to Milan Chytrý (chytry@sci.muni.cz) or another member of the EVA Coordinating Board.

- Applicant's name:

Vasheniak Iuliia

- Applicant's institutional address:

Khmelnyskyi Institute of Interregional Academy of Personnel Management, Prospect Myru Str., 101A, Khmelnytslyi, 29015, Ukraine; Kholodny Institute of Botany of National Academy of Science, 2, Tereshchenkivska str., 01601, Kyiv, Ukraine

- Applicant's e-mail:

vasheniyak@mail.ru

- Project title:

Comparative analysis of petrophytic steppes and outcrops vegetation from Central and Eastern Europe

- Brief description of aims and methods of the study:

We want to make comparison of Ukrainian petrophytic steppes and outcrops vegetation with Central Europe petrophytic steppes and to distinguish clear diagnostic block of species of Ukrainian petrophytic steppes and outcrops vegetation, to determine syntaxomonal position of vegetation of the class Helianthemo-Thymetea (we assume that this vegetation is a part of *Stipo pulcherrimae-Festucetalia pallentis* order).

- Will someone else be involved in data editing or analysis in addition to the applicant?

Iakiv Didukh, professor, Doctor of Biological Science; Olga Chusova, PhD student

- Estimated time of delivery of results (e.g. manuscript submission):

October 2017

- Geographic area needed (e.g. countries or range of geographic coordinates):

Romania, Bulgaria, Hungary, Slovakia

- Do you need plots to be georeferenced? If so, what is the minimum accuracy of plot location (in metres or kilometres) needed for your project?

No, we do not need plots to be georeferenced

- Vegetation types needed (syntaxa):

*Stipo pulcherrimae-Festucetalia pallentis*, *Alyso-Sedetalia albae*

- Other data selection criteria:

## Data Request Form

It would be preferred if there are syntaxa names in header data in the dataset

- Envisaged publications:

We are planning to publish 1 paper about *Stipo pulcherrimae*-*Festucetalia pallentis* order in Ukraine in some international journal.

- Specification of the co-authorship arrangements in publications based on the requested data. Note that the EVA Rules recommend that co-authorship is offered to a representative of each database providing data that are particularly important for the project (e.g. unique vegetation types, under-represented geographic areas) or make up more than 10% of the final dataset (5% threshold can be considered too). These database representatives should be experts in the topic of the project (they do not need to be the custodians or deputy custodians) and they should contribute to the project more than just by providing the existing data, e.g. by intellectual contribution to the concept of the paper, preparation of new data, or helping with data analysis, interpretation of the results or writing parts of the paper (see the IAVS Code of Professional Ethics: <http://iavs.org/Governance/Code-of-Professional-Ethics.aspx>). The project leader should enable active participation by regularly informing potential co-authors about the progress of the project from its early stage. The project leader should also make final co-authorship arrangements based on the real input of the individual contributors.

Didukh Iakiv will be the lead author of the planned publications, co-authors will be Vasheniak Iuliia and Chusova Olga. However, we are planning to compare Ukrainian releves with the same types from other countries and use them as a model to be compared. Persons with significant contribution to data analysis or data providers or analysts of other data (e.g. bioclimatic data) may be involved as co-authors.

- Eligibility of the applicant to receive EVA data. Specify to which EVA database the applicant has contributed; if the applicant is not the custodian or deputy custodian of an EVA database, give a name of a custodian or deputy custodian who supports this data request.

I am deputy custodian of Ukrainian Grassland Database (EU-UA-001).

I agree with the terms of EVA Data Property and Governance Rules as approved on 26 May 2012 (<http://euroveg.org/download/eva-rules.pdf>).

19/01/2017

Vasheniak Iuliia
