

## ReSurveyEurope

### Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová ([ikuzel@sci.muni.cz](mailto:ikuzel@sci.muni.cz)) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

Biosphere Reserve Wienerwald

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

Evaluating the zonation of the Biosphere Reserve Wienerwald

- REFERENCE (publication or URL or DOI of the dataset if published online):

<https://doi.org/10.1016/j.agee.2017.04.002>

- DATA OWNER: person(s), institution(s):

Wolfgang Willner, University of Vienna

- CONTACT E-MAIL:

[wolfgang.willner@univie.ac.at](mailto:wolfgang.willner@univie.ac.at)

- METHODS (description of sampling design and methods):

coordinates of old plots were extracted from accurate maps in master theses and resurveyed; old plots had plot sizes between 15 and 25 m<sup>2</sup> (no information of exact plot size for individual plots was available); new plots had always 25 m<sup>2</sup>

- ENVIRONMENTAL DATA (list of environmental data measured):

altitude, slope, aspect

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

no treatment by us

Vienna, 20 January 2021

Wolfgang Willner
