

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

NP Donau-Auen

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

NP Donau-Auen Grasland Monitoring

- REFERENCE (publication or URL or DOI of the dataset if published online):

-

- DATA OWNER: person(s), institution(s):

Norbert Sauberer

- CONTACT E-MAIL:

norbert.sauberer@vinca.at

- METHODS (description of sampling design and methods):

- Purpose of the study: influence and adaption of management, long-term changes of vegetation.
- Type of vegetation: grassland (wet to dry)
- Research area: Danube National park between Vienna and Bratislava
- Type of plots: resampling (quasi-permanent plots)
- Cover scale: adapted Braun-Blanquet (sensu Reichelt & Wilmanns 1973)

- ENVIRONMENTAL DATA (list of environmental data measured):

-

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)
