

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):
 Forêts Alpes vaudoises
- FULL PROJECT NAME (use if the full project name is longer than used in the database):
- REFERENCE (publication or URL or DOI of the dataset if published online):
 Scherrer, D., Massy, S., Meier, S., Vittoz, P. & Guisan, A. (2017) Assessing and predicting shifts in mountain forest composition across 25 years of climate change. *Diversity and Distributions*, 23, 517-528.
- DATA OWNER: person(s), institution(s):

Pascal Vittoz & Antoine Guisan, University of Lausanne

METHODS (description of sampling design and methods):

Systematic inventories with the Braun-Blanquet's method of the forests in the 1990s. Some of the plots were looked for in 2014, based on original coordinates and tree composition and repeated.

• ENVIRONMENTAL DATA (list of environmental data measured):

Exposition, slope, elevation, tree, shrub, herb covers, bryophyte, litter, rock covers.

 MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

No

Sierre, 26.01.2021
