

### Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová ([ikuzel@sci.muni.cz](mailto:ikuzel@sci.muni.cz)) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

Marais Jura

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

- REFERENCE (publication or URL or DOI of the dataset if published online):

Gallandat, J.-D. (1982) Prairies marécageuses du Haut-Jura. Molinietalia, Scheuchzerio-Caricetea fuscae et Phragmitetea. *Beit. Geobot. Landesaufn. Schweiz*, **58**, 1-180 + 151 tableaux, 183 cartes.  
Rion, V., Gallandat, J.-D., Gobat, J.-M. & Vittoz, P. (2018) Recent changes in the plant composition of wetlands in the Jura Mountains. *Applied Vegetation Science*, **21**, 121-131.

- DATA OWNER: person(s), institution(s):

Pascal Vittoz, University of Lausanne

- CONTACT E-MAIL:

pascal.vittoz@unil.ch

- METHODS (description of sampling design and methods):

Plant inventories with the Braun-Blanquet's method in the context of a study of wetlands in the Jura Mountain in 1970s. Plots relocated on the basis of descriptions and sketches in field-note book in 2012.

- ENVIRONMENTAL DATA (list of environmental data measured):

Exposition, slope, elevation, herb cover, bryophyte, litter, rock covers. Management in 2012

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

No precise data on historical management, but some of the plots were grazed in 1970 but were abandoned between both inventories.
