

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):
 Salajka forest development
- FULL PROJECT NAME (use if the full project name is longer than used in the database):

 Monitoring of forests left to spontaneous development NPR Salajka
- REFERENCE (publication or URL or DOI of the dataset if published online):
 NA
- DATA OWNER: person(s), institution(s):

The Silva Tarouca Research Institute for landscape and ornamental gardening, Department of Forest Ecology

CONTACT E-MAIL:

pavel.unar@vukoz.cz

METHODS (description of sampling design and methods):

Preferential localization of relevés in order to capture the habitat diversity of the site. The relevés are circular with r = 12.7 m (500 m²)

ENVIRONMENTAL DATA (list of environmental data measured):

Orientation, slope

• MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)
