

## ReSurveyEurope

## **Project Metadata Form**

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (<a href="mailto:ikuzel@sci.muni.cz">ikuzel@sci.muni.cz</a>) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

•	PROJECT NAME (identical with the Resurvey Project name given in the database):
	Saline and brackish grasslands of the Baltic Sea coast

- FULL PROJECT NAME (use if the full project name is longer than used in the database):
- REFERENCE (publication or URL or DOI of the dataset if published online):

Pätsch et al. 2019 DOI: 10.1127/phyto/2019/0339; Pätsch et al. 2019 https://doi.org/10.2478/s11756-019-00195-1

• DATA OWNER: person(s), institution(s):

Ricarda Pätsch

CONTACT E-MAIL:

Ricarda.paetsch@gmail.com

METHODS (description of sampling design and methods):

4x4m quasi-permanent plots (not marked in the field) taken following Br-Bl method for PhD thesis

• ENVIRONMENTAL DATA (list of environmental data measured):

Salinity, pH,conductivity,cover total, average and maximum height of vegetation

• MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)
