

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

Itoiz floodplain forests

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

- REFERENCE (publication or URL or DOI of the dataset if published online):

- DATA OWNER: person(s), institution(s):

Irati Sanz, Univ. Basque Country

- CONTACT E-MAIL:

irati.sanz@ehu.eus

- METHODS (description of sampling design and methods):

Location method: 05; old plots have location precision of 30 to 400 m, and were not precisely delimited nor marked (but indicated in which polygon of vegetation map were located). New plots are precisely delimited and marked with six poles and coordinates measured in the six poles

- ENVIRONMENTAL DATA (list of environmental data measured):

Elevation

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

Bilbao, 26 April 2022

Irati Sanz
