

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

area using specific methods.	
•	PROJECT NAME (identical with the Resurvey Project name given in the database):
	Basque Coastal Marshes
•	FULL PROJECT NAME (use if the full project name is longer than used in the database):
•	REFERENCE (publication or URL or DOI of the dataset if published online):
•	DATA OWNER: person(s), institution(s):
	Idoia Biurrun and Juan Antonio Campos, Univ. Basque Country
•	CONTACT E-MAIL:
	idoia.biurrun@ehu.eus
•	METHODS (description of sampling design and methods):
	Location method: 01; plots are marked by sticks in four corners; additionally
	coordinates measured in four corners of the quadrat with a precision device.
	Changes in coastal vegetation in natural and restored zone (master thesis) in
	Barbadun estuary in Bizkaia (Basque country, Spain). Old plots were marked (lost),
	new plots permanently marked.
•	ENVIRONMENTAL DATA (list of environmental data measured):
	Elevation (microtopography), slope, aspect, vegetation structure, soil parameters,
•	MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

Bilbao, 13 November 2021
