

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

Valdemaqueda_Madrid

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

- REFERENCE (publication or URL or DOI of the dataset if published online):

- DATA OWNER: person(s), institution(s):

Rosina Magaña; Daniel Sánchez-Mata

- CONTACT E-MAIL:

rmagana@ucm.es; dsmata@ucm.es

- METHODS (description of sampling design and methods):

Purpose of the study. Recovery of vegetation after fires. The study area suffered a very intense fire in 2012 and 2014.
 Type of vegetation. Annual grasslands in lowland areas (900-1200 m) and perennial grasslands in higher altitudes (1360 m).
 Research area. Madrid: Valdemaqueda. Southwestern areas of Sierra de Guadarrama: from 900 m to peak Risco Grande (Santa Catalina, 1385 m).
 Type of plots – permanent plots, no manipulated
 Location in field for permanent plots – marked in the field Y/N? Yes
 Cover scale. Braun Blanquet

- ENVIRONMENTAL DATA (list of environmental data measured):

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

No manipulation

[place, date] Madrid, January 31 2021
