

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

•	PROJECT NAME (identical with the Resurvey Project name given in the database):
	Hungary_Deak

- FULL PROJECT NAME (use if the full project name is longer than used in the database):
- REFERENCE (publication or URL or DOI of the dataset if published online):
- DATA OWNER: person(s), institution(s):

Balázs Deák, Lendület Seed Ecology Research Group, Institute of Ecology and Botany, Centre for Ecological Research, Vácrátót, Hungary;

deputy-owner: Orsolya Valkó, Lendület Seed Ecology Research Group, Institute of Ecology and Botany, Centre for Ecological Research, Vácrátót, Hungary

METHODS (description of sampling design and methods):

Re-survey of permanents plots in alkaline meadows (Ele, Ely, Mata_Agr, Zam_Agr), alkaline wetlands (Car, Mata_Bol, Zam_Bol), loess grasslands (Loess) and fen meadows (Nyir, Leta) in the Great Hungarian Plain. The percentage cover of all rooted vascular plants was estimated during the survey.

• ENVIRONMENTAL DATA (list of environmental data measured):

 MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

Manipulation include abandonment of former mowing regime; mowing (in different seasons), grazing and mulching. All of these are specified at the header of each plot.
