

## ReSurveyEurope

### Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová ([ikuzel@sci.muni.cz](mailto:ikuzel@sci.muni.cz)) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

ALATERNUS

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

COASTAL MAQUIS OF CENTRAL-SOUTHERN ADRIATIC DUNES

- REFERENCE (publication or URL or DOI of the dataset if published online):

- DATA OWNER: person(s), institution(s):

Stanisci Angela, Associate professor of University of Molise (Italy) ; Francesco Pio Tozzi, PhD student University of Molise (Italy)

- CONTACT E-MAIL:

[stanisci@unimol.it](mailto:stanisci@unimol.it); [f.tozzi@studenti.unimol.it](mailto:f.tozzi@studenti.unimol.it)

- METHODS (description of sampling design and methods):

Random stratified sampling design according to EU habitats distribution map;  
Resurvey of square plots (4x4 m);  
Plant species covering follows Braun-Blanquet scale (old).  
Nomenclature checked in Euro+Med PlantBase - the information resource for Euro-Mediterranean plant diversity. <http://ww2.bgbm.org/EuroPlusMed/>

- ENVIRONMENTAL DATA (list of environmental data measured):

Geographical coordinates (utilizing GPS);  
EU habitats identification;  
Vascular plant species list and abundance-cover.

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

Termoli (Italy), 2021/01/21

Angela Stanisci, Francesco Pio Tozzi
