

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

Jan Mayen

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

- REFERENCE (publication or URL or DOI of the dataset if published online):

- DATA OWNER: person(s), institution(s):

Jutta Kapfer (Norwegian Institute of Bioeconomy Research, NO), John-Arvid Grytnes (University of Bergen, NO)

- CONTACT E-MAIL:

jutta.kapfer@nibio.no

- METHODS (description of sampling design and methods):

Semi-permanent plots sensu Kapfer et al. 2017; coordinates of original plots are unknown, locations and communities were described in detail in the original study by Lid (1964) and vegetation resurveyed in plots located as close as possible to expected location. Plot size 1m x 1m, Hult-Sernander-du Rietz abundance scale (+,...5)

- ENVIRONMENTAL DATA (list of environmental data measured):

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

N.A.

Tromsø/Bergen, 27.01.2021
