

## ReSurveyEurope

## **Project Metadata Form**

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (<a href="mailto:ikuzel@sci.muni.cz">ikuzel@sci.muni.cz</a>) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):
   The Sudetes forest
- FULL PROJECT NAME (use if the full project name is longer than used in the database):

  The Sudetes forest resurvey
- REFERENCE (publication or URL or DOI of the dataset if published online):
   Not referenced
- DATA OWNER: person(s), institution(s):
   Krzysztof Świerkosz & Kamila Reczyńska
- CONTACT E-MAIL:

krzysztof.swierkosz@uwr.edu.pl; kamila.reczynska@uwr.edu.pl

- METHODS (description of sampling design and methods):
  - Phytosociological studies conducted using the classic Braun-Blanquet method within plots with the area of 200-225 square meters, using a standard scale (r, +, 1, 2, 3, 4, 5).
  - Resurveyed plots are located within forest complexes of high biodiversity importance, selected in the field during field studies conducted by the data owners in previous years (since 1989). The database is at the initial stage of creation.
- ENVIRONMENTAL DATA (list of environmental data measured):

Altitude, slope, aspect

 MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

Plots not manipulated

Wrocław, Poland 2.03.2022
