

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (<u>ikuzel@sci.muni.cz</u>) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):
 Suatu succession
- FULL PROJECT NAME (use if the full project name is longer than used in the database): Studying secondary succession on abandoned fields by permanent plots at Suatu, Romania
- REFERENCE (publication or URL or DOI of the dataset if published online):
 Unpublished data
- DATA OWNER: person(s), institution(s):
 Eszter Ruprecht, Hungarian Department of Biology and Ecology, Faculty of Biology and Geology, Babeş-Bolyai University from Cluj-Napoca, Romania
- CONTACT E-MAIL:
 eszter.ruprecht@ubbcluj.ro
- METHODS (description of sampling design and methods):

 Abandoned agricultural fields representing different successional stages were selected for the analysis: 1 yr old (site 36), 2 yr old (site 25), 10 yr old (site 2), and 21 yr old (site 14). The size of the fields varied between 2-19 ha. Vegetation changes in these four old-fields were studied by investigating permanent plots. Permanent plots were marked by metal sticks.
- ENVIRONMENTAL DATA (list of environmental data measured):
- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)
 Plots were not manipulated.

Cluj-Napoca, 8.02.2021
