

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

PROJECT NAME (identical with the Resurvey Project name given in the database): Succession steppe TR FULL PROJECT NAME (use if the full project name is longer than used in the database): REFERENCE (publication or URL or DOI of the dataset if published online): Published literature data https://doi.org/10.3329/bjb.v44i4.38561 DATA OWNER: person(s), institution(s): Behlül Güler, Dokuz Eylul University CONTACT E-MAIL: behlul.guler2@gmail.com METHODS (description of sampling design and methods): Data consists of floristic change of burnt areas in 5 permanent plots, which is evaluated as a single plot (500 m²). Fire occurred in 1997 and data was collected yearly from 1997 to 2003 as well as in 2007. GPS coordinates of location obtained from a description and include accuracy. ENVIRONMENTAL DATA (list of environmental data measured): MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)	ea using s	pecific methods.
