

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

Monthly succession red pine forests TR

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

- REFERENCE (publication or URL or DOI of the dataset if published online):

Unpublished literature data.
(Türkmen, N. (1994). Post-fire vegetation dynamics in red pine (*P. brutia* Ten.) forest ecosystems in the Eastern Mediterranean Region. Institute of Science, Doctoral Thesis, Cukurova University)

- DATA OWNER: person(s), institution(s):

Behlül Güler, Dokuz Eylul University

- CONTACT E-MAIL:

behlul.guler2@gmail.com

- METHODS (description of sampling design and methods):

Data consists of compositional change of burnt areas in 4 permanent plots (10 x 10 m each). Fire occurred end of February 1989. Data was collected monthly starting from right after the fire during 3 years (until February 1992). GPS coordinates of location obtained from the study and include accuracy.

- ENVIRONMENTAL DATA (list of environmental data measured):

Elevation, aspect, slope

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

post-fire succession
