

## ReSurveyEurope

### Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová ([ikuzel@sci.muni.cz](mailto:ikuzel@sci.muni.cz)) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

Stenshuvud

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

EU\_040. A grid of 30 permanent plots in an unmanaged *Carpinus betulus* stand in Stenshuvud national park, protected since 1984.

- REFERENCE (publication or URL or DOI of the dataset if published online):

- DATA OWNER: person(s), institution(s):

Jörg Brunet, Swedish University of Agricultural Sciences (SLU)

- CONTACT E-MAIL:

Jorg.brunet@slu.se

- METHODS (description of sampling design and methods):

30 permanent circular 5 m<sup>2</sup> plots for ground vegetation. Vernal and summer species included for the years 1988, 2015 (and 2022 not yet included in the data base).

- ENVIRONMENTAL DATA (list of environmental data measured):

Cover % of ground vegetation. Soil pH (H<sub>2</sub>O and KCl) 0-5 cm, Loss on ignition, base saturation %, Al-content, tree canopy cover % based on hemispherical photos.

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

Alnarp, 8 August 2022

Jörg Brunet
