

ReSurveyEurope

Project Metadata Form

When contributing data to ReSurveyEurope, please fill in this form for each resurvey project and send it to Ilona Knollová (ikuzel@sci.muni.cz) together with the database. A resurvey project is understood as repeated sampling of a certain type of vegetation in a certain study area using specific methods.

- PROJECT NAME (identical with the Resurvey Project name given in the database):

Nardaies

- FULL PROJECT NAME (use if the full project name is longer than used in the database):

- REFERENCE (publication or URL or DOI of the dataset if published online):

- DATA OWNER: person(s), institution(s):

Pascal Vittoz, University of Lausanne

- CONTACT E-MAIL:

pascal.vittoz@unil.ch

- METHODS (description of sampling design and methods):

Plant inventories with the Braun-Blanquet's method in the context of a study of different studies on pasturelands in the Jura Mountains. Plots relocated on the basis of different information (maps, sketches, coordinates).

- ENVIRONMENTAL DATA (list of environmental data measured):

Exposition, slope, elevation, herb cover, bryophyte, litter, rock covers.

- MANIPULATED PLOTS (description of the treatment if the plots were manipulated, e.g. mowing twice a year, fertilizing by NPK once a year, post-fire succession)

Some of the plots were probably fertilized between inventories, but management data not available.
